

Re: Placing priority on LPFM translators over FM translators. We currently listen to K-LOVE on FM105.5 in Northeast Arkansas. K-LOVE is the only Christian music station that we can receive and MANY people in our area listen to the Christian music, news, and message it offers. It is considered a valuable resource in our local community. Many members of the churches in our community, and indeed, people who are not church attenders, can listen to the newest Christian music. Our teens enjoy the upbeat, contemporary nature of the music played. Our community would be affected if we lose this positive influence. WE are a small rural community with few opportunities to listen to concerts or hear speakers, so we rely on K-LOVE to keep us informed and inspired. A large city might provide more opportunities for Christian music and speakers, however, with the hectic pace most Americans live, the radio is still an invaluable source and K-LOVE is needed in our community. Please consider these factors as you make the decision about LPFM stations. Thank you.
